PROJECTS

TrackEnsure ELD

- An electronic logging device (ELD) is a specialized hours tracker required by law for truck drivers driving in the US as part of US Department of Transport (DOT) regulations
- Our solution is one of the 50 software solutions certified by the DOT
- I was responsible for most of the UI design that is still used today, as well as contributed significantly to the frontend and backend codebase of the application
- It is now used by over 5000 truck drivers daily

Stock Tickers Auto-suggest

- A mini service that is used to provide an API for implementing stock tickers auto-suggest feature, something that is surprisingly not freely available
- Everyday, an up-to-date stock list is fetched directly from Nasdaq to our database, which is then used to provide search functionality

UofT Droprate

- Tracks the list of most and least dropped course at the University of Toronto
- Provide unbiased statistics of how hard a class actually is/was, something that was not available when I was a student

Unbeatable Tic Tac Toe AI

- A playable and unbeatable Tic Tac Toe AI

Tami Social

- A beautiful social app completed as part of a contract with a client

Studilicious

- An app intended to be a food delivery service for students, completed as part of a contract with a client
